◆ Company

Omnea was established in 2004 is a **licensed^[1]** by the Ministry of Communications telecom operator with a focus on telecommunications services, research and development, and information technology using cutting edge mechanisms designed to meet and exceed the needs of its business clients in Iraq.

[1] Ministry of Communications

Network's Overview

◆ Reliability

Omnnea is the only entity in Iraq that provides 99.5% broadband reliability. Multiple combinations of fiber optic and licensed microwave routes are used to ensure high reliability.

◆ Redundancy

Redundancy is implemented at every level to ensure a fully reliable network with multiple switching sites.

◆ Security

Licensed armed guards, monitoring surveillance, and electronic security are implemented at Omnnea's sites to maintain secure and reliable operations.

◆ Power Backups

In addition to using multiple fixed & mobile power generator units, a stack of battery back ups are used to ensure smooth operation.

◆ NOC

24/7 Network Operation & Control center to monitor network activities to ensure instant response to any technical issues.

◆ Disaster Recovery

Omnnea has a strict policy of avoiding points of failure. This is achieved through redundant hardware and multiple independent routes and hot site strategy.
